### Fulton F2 Twin Track Trailer Jack

New generation of jack technology. Brings together advances in material technology. Every feature has been re-designed, resulting in 9 patent-pending innovations. Makes every other jack in its class obsolete. Precision extruded aluminum alloy inner and outer tubes combined with twin alignment bushings ensure a precision fit. The anodized finish keep the tubes virtually corrosion free. Engineered to be the strongest swivel mechanism in the industry. It also has the first mounting system that can be adjusted to any desired height. An integrated pull pin with an ergonomic grip makes it easy to swivel into position. Twin track 7" diameter wheels are designed to roll independently and make changing direction smooth and effortless. A wider wheel base adds superior stability. It's easy to swivel into position for lifting or transport.

### Boat Guide-On Poles

Centers the boat on the trailer, reducing loading to an easy, one-man operation. Installs in seconds and is easy to adjust. Also aids in backing and placement of trailer. Keeps tail lights out of the water. Guide arms are made of electrostatically coated high gloss steel tubing, covered with non-marring PVC tubing to protect the boat. Complete with electrical wires, electrical connectors, mounting brackets and adjustable hardware, fitting tube or channel trailers up to 5" deep and 2" wide. Uses existing trailer lights. Maximum width adjustment is 36" overall, 18" each side of the trailer. 36" high. Sold in pairs.
