ACR GlobalFix V4 EPIRB

Drastically increase your probability of survival at sea with the multiple built-in redundancies of these units. Upon activation the GlobalFix V4's robust internal GPS accurately fixes your exact location. Coordinates are then broadcast via a powerful 406 MHz distress signal to Search and Rescue forces worldwide. Internal 66 channel GPS for faster acquisition from cold start. A protective keypad cover helps prevent false activation and all-new, user replaceable battery pack has a 10 year replacement interval - reducing the overall ownership cost and making replacement a breeze.

Two functional self-tests to monitor the beacon's transmission, and battery performance and GPS acquisition.

Pair these tests with ACR's 406Link.com optional testing portal (available for Americas only) and receive satellite confirmation messages directly to your cell phone or email.

Should you ever use the beacon in a life-threatening situation, ACR will replace it free of charge. Simply submit your story to ACR's SurvivorClub.com program and return your used beacon for a free replacement. See terms and conditions at www.survivorclub.com.

238406	2831	Cat. II (Manual Activation)	\$598.33

ACR AquaLink™ Personal Locator Beacon

Three levels of integrated signal technology - GPS positioning, a powerful 406 MHz signal and 121.5 MHz homing capability.

The AquaLink™ quickly and accurately relays your position to a worldwide network of Search and Rescue satellites, reducing search time and increasing your chances of survival. It's reliable signaling technology that has saved more than 25,000 lives since 1982.

The AquaLink™ broadcasts a unique registered distress signal that not only tells rescuers where you are, but who you are. The onboard GPS can fix your position to within 100 meters and then utilizes a powerful 406 MHz signal to relay your distress call to orbiting satellites. As local Search and Rescue is deployed, a separate homing signal and integrated LED strobe light guide rescuers to your exact location.

The AquaLink™ is small enough to be easily carried in a pack or pocket or can be worn on deck, at the helm, in quarters or on a life vest and will float if accidentally dropped overboard. Performing a full functional self test of the PLB's internal circuitry, battery voltage & power, and 406 MHz transmission gives you the peace of mind knowing your PLB will work the moment you need it to the most. ACR Exclusive: Built-in GPS acquisition test mode allows you to test GPS functionality up to 12 times over the life of the battery life.

Tap in to the same field-tested rescue technology used by the U.S. Military, Coast Guard, NATO Special Forces and Arctic explorers.

- No Subscription Fees
- Floats
- Super Bright LED Strobe
- On Board 66 Channel GPS
- Self-Test and GPS Test Features
- Typical Performance 35 Hours
- Non-Hazmat Battery
- Made in the U.S.A

ACR GlobalFix Pro 406 EPIRB with Built In GPS

Next generation GlobalFix Pro features a professional grade, 16-channel GPS receiver for faster location acquisition - typically 3-5 times faster than a conventional GPS from a cold start. Upon activation, the built-in GPS receiver transmits your position coordinates in a powerful 406 MHz signal along with your registered, digitally-coded distress signal and a 121.5 MHz SAR homing frequency. The 110-yd GPS position accuracy is the optimum allowed by Cospas-Sarsat.

Also features a built-in LED strobe light, full-function test mode and GPS acquisition testing. The exclusive polycarbonate blend case is designed for maximum UV, chemical, temperature and shock resistance.

ACR GlobalFix iPro 406 EPIRB with Built In GPS

A digital display that allows you to see all of the beacon's operational activities. The screen displays GPS LAT/LON, operating instructions, usage tips, transmission bursts as well as battery power.

iPRO makes self-testing your beacon simple and easy to understand with the digital display visually walking you through the self test step by step, no more relying on listening to beeps and LEDs.

The GlobalFix™ iPRO is also the first EPIRB that offers Dual GPS Technology. Interface your iPRO to your onboard GPS to ensure that your LAT/LON is stored inside so the coordinates are transmitted in the first data burst. iPRO's internal GPS is optimized for cold starts and is tested and refined at ACR's GPS Simulation Center so that it will pin-point your exact location faster than standard GPS enabled EPIRBs.

GlobalFix™ iPRO offers the very latest in marine electronic life saving technology:

Highly visible LED strobe - Energy efficient.

High efficiency electronics - Performance you can count on.

Non-hazardous batteries - No shipping hassles.

Professional grade design - Engineered, tested and built for years of abusive marine use.

Ergonomic, compact design; Smallest feature rich EPIRB available.

HydroFix™

HRU Hydrostatic Release Unit for Category I EPIRBs

Patented rod system allows release of the beacon from a Category I bracket when submerged in water between 1.5 - 4 meters (4.9 - 13.1 feet). Designed to work with Sea Shelter™, Sea Shelter™ 2 and Sea Shelter™ 3 brackets.

A patented rod system does not rely on a battery, blade or pyrotechnic device to release the beacon. This advantage allows for a quick, seamless and reliable release in an emergency.

Note that this is a date-stamped product and must be replaced every 2 years from the date of installation or 4 years from the date of manufacture.

Easily replaceable
100% factory tested
Size: 2.5" x 3.4" x 2.0" (6.3 x 8.6 x 5.0 cm)
Weight: 3.3 oz (93.6 g)

Fell Marine MOB+ (Man Overboard) Basepack Multifob

MOB+ is an electronically controlled, wireless cut-off switch which can be used on all boats. Gives users all the benefits of electronics but also freedom and additional safety as well. Fell Marine recommends this unit on boats 40' or less in length. Allows user to move about boat or even walk on the dock. If you fall in the water it will stop engine because the xFOB gets submerged which breaks wireless signal. If you go out of the range of the MOB+ the engine will stop.

ACR AISLink Man Overboard Beacon

Compact and affordable man overboard beacon with integrated Digital Selective Calling (DSC) and GPS. Unlike a personal locator beacon, which signals orbiting search and rescue satellites, AISLink sends an alert message within seconds to all local vessels with an AIS receiver and/or AIS-enabled plotter and the DSC alarm on your vessel's VHF can also be signaled.

The AISLink MOB may be configured by the user to enter the vessel's DSC MMSI number.

Commercial Marine Battery Life 7 Years from date of manufacture or after emergency use (24+ hours operational battery life)

Waterproof 10 Meters Weight 0.2 lbs (92 g)

Warranty 5 years

The Battery is only warranted until the date of expiry and provided the unit is tested in accordance with the information in the user manual.

GPS Enabled

Dimensions 4.52 x 1.81 x 1.06 in.

ACR C-Strobe H2O

LED Personal Distress C-Strobe Light

With 3 modes of operation (strobe, steady-on, SOS), the C-Strobe H2O boasts a 45 lumen LED that operates typically for 120 hours continuously in strobe mode. The C-Strobe H2O model includes two activation methods; the light can easily be activated with a simple push of the On/Off button or when in the armed position, can be activated automatically when immersed in water*, making this an ideal light for all outdoor enthusiasts.

The slim, lightweight and versatile design fits easily in a pocket or hangs discreetly when attached to a life jacket or backpack. The flexible lashing loops on the side of the product allow for multiple mounting options including the webbing on your backpack or straps on your life jacket. The Velcro® strap can be secured around the lashing loops and creates countless additional mounting possibilities. The light also comes with a clip designed to conveniently slide over your inflatable life jacket's oral inflation tube for storing your light inside your life jacket.

Kidde Intelligent Alarm Battery Operated Combination Smoke & Carbon Monoxide Alarm

Uses breakthrough technology to offer a fast response to real fires, including smoldering and fast-flaming, as well as protect you from carbon monoxide and dramatically reduce the chance of nuisance alarms. In addition, the Intelligent Alarm contains a voice warning that clearly states the present danger – smoke or carbon monoxide – and announces "FIRE!" or "WARNING! CARBON MONOXIDE!" The Intelligent Alarm combines the detection capabilities of an ionization smoke sensor – which is more likely to detect smaller, less visible fire particles, like those produced by flaming fires – with that of an electrochemical sensor, which is used to detect CO. Since carbon monoxide is present in all fires, having both detection chambers work together in one alarm is a breakthrough in the fire safety industry.

Forespar Sta-plug® Emergency Marine Leak Solution

Sta-Plug is a temporary or emergency plug for your boat where water would enter a circular, oval, or irregular hole caused by maintenance failure or hull breach due to impact. Tapered circular cone shaped plug made of a proprietary foam formulation that is a solid, spongy and coated with a flexible sealer 9" (23 cm) high, 4.75" (12 cm) diameter at base. Sta-Plug is compressed by hand and inserted into the hole stopping or reducing the inward flow of water as the foam returns to its original shape.

Sta-Plug can also be cut, twisted and/or compressed to fill any shape hole.

Not guaranteed to stop all water leaks and is designed to be used alone or in conjunction with other emergency equipment including bilge pumps. For boats under 30' we recommend two Sta-Plugs and a Minimum of three for any boat in excess of 30'.
